

9.9 Appendix 9 – Approved Flagpole Mounting Hardware

Flagpoles may be mounted only on a column on the front porch of units, using the following hardware, which is available from:

American Flag and Gift

(800) 448-3524

<http://www.anyflag.com/flagpoles/flaghard.php>

1" Ultimate adjustable bracket, die cast aluminum white paint
(Optional) 1" Neverfurl kit

Stainless steel mounting straps (similar to hose clamps) (available at hardware outlets)

Bracket - Item# E310044	\$13.00
(Optional: Neverfurl kit for 1" pole, Item# 310117)	(\$12.95)
Shipping	\$6.95

The bracket is mounted on the column with the two stainless steel mounting straps; the screws which come with the bracket are not used. Before mounting, the outside and edges of the straps should be sanded with fine sandpaper or emery cloth and sprayed with a metal primer. After mounting, the straps can be cut short and painted to match the column. Call the Management Company to obtain a small amount of the proper paint.

The optional Neverfurl device allows the flag to swing completely around the pole without furling.

Flags and flagpoles are also available from the same company or from local hardware and home improvement outlets.
